

Action plan submitted by Mehmet Yavuz for Cahit Sıtkı Tarancı İlkokulu - 27.01.2021 @ 16:41:54

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.
- › An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.

Pupil and staff access to technology

- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.
- › All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.

Data protection

- › You have a good policy of encrypting pupil data and storing it safely. Ensure all new staff made aware of the procedures for encryption and data handling and that there is a named point of contact acting as the data controller for your school. Upload to your school profile some guidelines about protecting sensitive data through an encryption system so that other schools can benefit from your experience.
- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share

them with others.

- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.

Software licensing

- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

IT Management

- › It is good practise that your are training and/or providing guidance in the use of new software that is installed on school computers. This ensures that school members will take advantage of new features, but also that they are aware of security and data protection issues where relevant.

Policy

Acceptable Use Policy (AUP)

- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.

Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › It's good that you have a clear School Policy on handling out-of-school eSafety incidents; is the number of these declining? Start a discussion thread in the community on what other preventative measures or awareness raising activities could be used in order to reduce the number of issues further. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.
- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to

building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.

Staff policy Pupil practice/behaviour

- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.
- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

School presence online

- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.
- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetymal.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

Practice

Management of eSafety

- › In addition to a clear designation of responsibility to ensure that all necessary network security and user privacy checks are in place, it is essential that schools also have audit and procedural checks at regular intervals. Without this, a school will be leaving itself vulnerable. See our fact sheet on School Policy at www.esafetymal.eu/group/community/school-policy.
Although there should always be an overall lead person on eSafety just as you have in your school, everybody in the school has a shared responsibility to secure any sensitive information used in their day to day professional duties. Even staff not directly involved in data handling should be made aware of the risks and threats and how to minimise problems. Use our fact sheet Acceptable Use Policy (www.esafetymal.eu/group/community/acceptable-use-policy-aup-) to ensure that everyone plays their part in ensuring they are all the best and safest digital citizens they can be.
- › It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person

who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylabel.eu/group/teacher/incident-handling.

- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy www.esafetylabel.eu/group/community/school-policy.

eSafety in the curriculum

- › It is good that sexting has been integrated into wider online safety education across the school. Are you able to assess the impact of this education? Does it help pupils to modify their behaviours? How do you know?
- › It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).

Extra curricular activities Sources of support

- › It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.
- › It is great that you have a staff member which is knowledgeable in eSafety issues who acts as a teacher of confidence to pupils.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.
- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at www.esafetylabel.eu/group/community/information-for-parents to find resources that could be circulated to parents and ideas for parent evenings.

Staff training

- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetylabel.eu/group/community/suggestions-for-online-training-courses.

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can

upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
